Forecast for Monday 04 Nov 2024

Weather: Cloudy with a few spots of drizzle possible, especially over southern and southeastern fells. Best chance of any clearer or brighter spells expected across more northern or northwestern fells.

Chance of cloud-free hill tops above 800m: Little chance for most, becoming around 40% in the north and northwest.

Low cloud and visibility: Periods or persistent cloud 450-600m, with patches below over southern and southeastern fells, the cloud perhaps occasional above 600-750m at times in the north and northwest. Away from cloud visibility good falling to several kilometres in any drizzle.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Feeling rather cold on the fell tops.

Forecast for Tuesday 05 Nov 2024

Weather: Remaining mostly dry, just a few spots of drizzle mainly across southern and southeastern fells, but cloudy for most, again the best of any brighter spells expected across the north and northwest.

Maximum wind: Southerly or southeasterly around 10mph.

Chance of cloud-free hill tops above 800m: Little chance for most, becoming around 40% in the north and northwest.

Low cloud and visibility: Periods or persistent cloud 450-600m, with patches below over southern and southeastern fells, the cloud perhaps occasional above 600-750m at times in the north and northwest. Away from cloud visibility good falling to several kilometres in any drizzle.

Temperature: **Valleys:** Plus 5 or 6 Celsius rising to plus 12 or 13 Celsius
At 800m: Plus 4 or 5 Celsius
Freezing level: Above the summits
